

SECURITY LOCK FOR TRAILER EMERGENCY COUPLING

Part No. ECL 003

The ECL003 Coupling Lock has been designed to fit over the Emergency “C” coupling on a semi-trailer in order to prevent unauthorised connection. It is a quick and convenient method of locking the coupling.

Trailers fitted with spring brakes are effectively immobilised if this device is fitted and if the air reservoirs are drained, as under these circumstances the trailer brakes cannot be released.

Please note that the ECL 003 is designed to supplement, not replace, any high-security anti-theft devices already fitted to the trailer.
